

GRAVELY *Sales* **BULLETIN**

BULLETIN NO. 1133

DATE: JANUARY 21, 1965

TO: ALL OUTLETS

SUBJECT: MODEL NUMBERS

Beginning January 1, Gravelly begins the identification of its attachments and accessory kits by means of model numbers.

On the most permanent portion of any attachment will appear a decal which will contain the name of that attachment and the model number.

We are beginning this model numbering system for three reasons:

1. Many Federal, City, State, and County Agencies request model numbers on their bids and specifications or on the instructions which accompany a delivered order.
2. By using model numbers, any attachment can be identified and the proper parts ordered for that particular attachment.
3. It will assist you and the factory in your ordering procedures.

A list of the model numbers that will be in use, and the items to which they refer, is attached to this bulletin.

All illustrated parts and price lists that are produced after this date and all references to attachments will contain the model number. This should save a great deal of confusion and make it easier to identify the proper parts to be used with attachments.

We suggest that in your ordering from either branches or the factory here that you begin ordering your attachments specifying the current model numbers.

###

MODEL NUMBERS
