

# GRAVELY *Technical* BULLETIN

BULLETIN NO. 806  
DATE: January 20, 1960  
TO: ALL DEALERS AND DISTRIBUTORS  
SUBJECT: TRUCK SKIDS

We have designed and are manufacturing a set of 8' Steel Truck Skids. They are permanent, strong, and safe. Constructed of heavy duty steel angle and expanded steel mesh, they minimize slipping, and the construction keeps the wheels "in the groove" so there is no danger of slipping off the sides. You can use them easily with Dual Wheels also, with the side Channels falling between the Dual Wheels.

These are available to you at our cost. The price is \$16.00 (Net) per pair of Skids, FOB Dunbar, West Virginia. Weight is 37 pounds each, 74 pounds per pair. Order by description: Gravely Truck Skids.
