GRAVELY — NEW Convertible 7.6

The Gravelly Convertible now boasts 7.6 horsepower—HIGH-TORQUE horsepower—which means the famed lugging power of the Gravelly engine is even greater. Your Gravelly Convertible keeps on working when others quit! Newly designed, more efficient combustion chamber and cylinder head, new carburetion, new ignition combine to give you power to spare for your toughest jobs.

How long will a Gravelly last? What's twice infinity? With the new easy-change, easy-service Air Filter, the Gravelly engine is doubly-protected against dirt and dust. The Gravelly engine, already famous as being "almost indestructible" will last even longer!

The Convertible Rider is designed for comfort, safety and convenience. Padded, back-supporting seat, protective fenders, solid floor, carry-all under the seat... all features that make the Gravelly Convertible Tractor sharp-looking, easy-handling, but most of all—functionally efficient.

Wide wheel-base gives you stability and comfort on sharp turns. And the carefully engineered balance of the Gravelly Convertible, its attachments and the Rider makes handling easy and comfortable.

Safer, too—there's a tractor between you and front-mounted power tools. Visibility is excellent. You see what you're doing while you're looking ahead. You are in constant instant command of the Convertible with a flip of a lever... Gravelly's famous no-clutch instant forward and reverse!

Now, just drop the stand and your Gravelly Convertible is held in just the right position to make attachment changing even easier.

☆☆ ALL-GEAR-DRIVE ☆☆

No belts or chains to wear, slip or break. No fancy-name drives. From the engine crankshaft to the attachment, the Gravelly Convertible boasts ALL-GEAR-AND-SPLINED-STEEL-SHAFT-DRIVE. Rugged, efficient...and most Gravelly power attachments are all-gear-drive, too!

★★★★ — **NEW POWER** — **NEW IDEA!** ★★★★★

RIDE for the mowing jobs, the hauling jobs, the fast jobs...

any work that can be done safely and more efficiently riding! With your Gravelly Convertible you have the advantages of riding—plus out-front visibility, plus greater safety; you're a tractor length away from the job being done!

With out-front attachments, you get to the rough jobs with the tool first instead of wheels—get the job done and back out with power!

But what about the steep slopes, terraces, overhangs, the garden? *With a Gravelly Convertible it's simple...*

★★★★★ **PULL ONE PIN** →

WALK for the tough jobs, the steep slopes, the garden...

anywhere it's neither safe nor practical to ride. Steep slopes? With optional dual wheels, the Gravelly Convertible will mow 60% slopes with ease. Low center of gravity hugs the slopes. For garden work, just walk and guide while the Convertible does the work—plowing, cultivating spraying. Brush cutting, land clearing, snow removal, rugged jobs are done with ease and speed walking that would be impractical riding.

Only the Gravelly Convertible gives you instant choice—*ride or walk as the job demands!*

39 TOOL

VERSATILITY
★ALL-SEASON★
USE

MOW, PLOW, REMOVE SNOW, GARDEN, HAUL, SPRAY...

name the job and the Gravelly Convertible has the right attachment. Rugged, heavy-duty and dependable, Gravelly fast-change attachments are designed so they become an integral part of the all-gear-drive Gravelly Convertible. You get more power, more efficiency at the job.

Your choice is wide—from among five different mowing tools, four snow removal tools, and a host of other gardening, lawn care and land clearing attachments. Every tool is a *working* tool—designed, built and proved for all season use year-after-year-after-year.

REASONS WHY GRAVELLY IS YOUR BEST BUY!

Owner Loyalty: Ask any Gravelly owner what he thinks about his Gravelly equipment—whether it's 20 years old or twenty months old. But be prepared to listen to a real sales talk—and perhaps to view a demonstration!

50 Years: The first Gravelly tractor was produced in 1917. It still runs. Gravelly is the oldest exclusively lawn and garden power equipment manufacturer in business today—you get the industry's newest products from the industry's oldest manufacturer.

No Obsolescence: Most Gravelly attachments fit *all* Gravelly Tractors . . . old or new. You never obsolete your Gravelly equipment—or your investment in it.
