

NOW the **GRAVELY TRACTOR**

with

SWIFTAMATIC 8 TRANSMISSION

4 SPEEDS FORWARD 4 SPEEDS REVERSE

**NOW—Flip a Lever, Choose the
Right Ground Speed for ANY Job!**

Gear up for speed. Gear down for lugging POWER—with a flip of a lever! Your choice from 4 forward, 4 reverse speeds . . . INSTANTLY pick the speed you need for the job you have to do!

Need speed for light lawn mowing, travel, the light jobs? Need bulldog power for plowing, snowblowing?

Now with ONE Gravelly Tractor you select the exact ground speed you need. ALL-GEAR-DRIVEN POWER does the toughest jobs at a crawl, the lightest jobs at a gallop. And there's a right speed ready for every job in between!

Be one of the first to enjoy Gravelly's *Swiftamatic 8* Transmission Tractor—and the new ease, new convenience, new efficiency in getting your tough jobs done fast!

SPEED RANGE

ATTACHMENT SPEED STAYS HIGH GROUND SPEED DROPS LOW—**BULLDOG POWER!**

NEW
EFFICIENCY

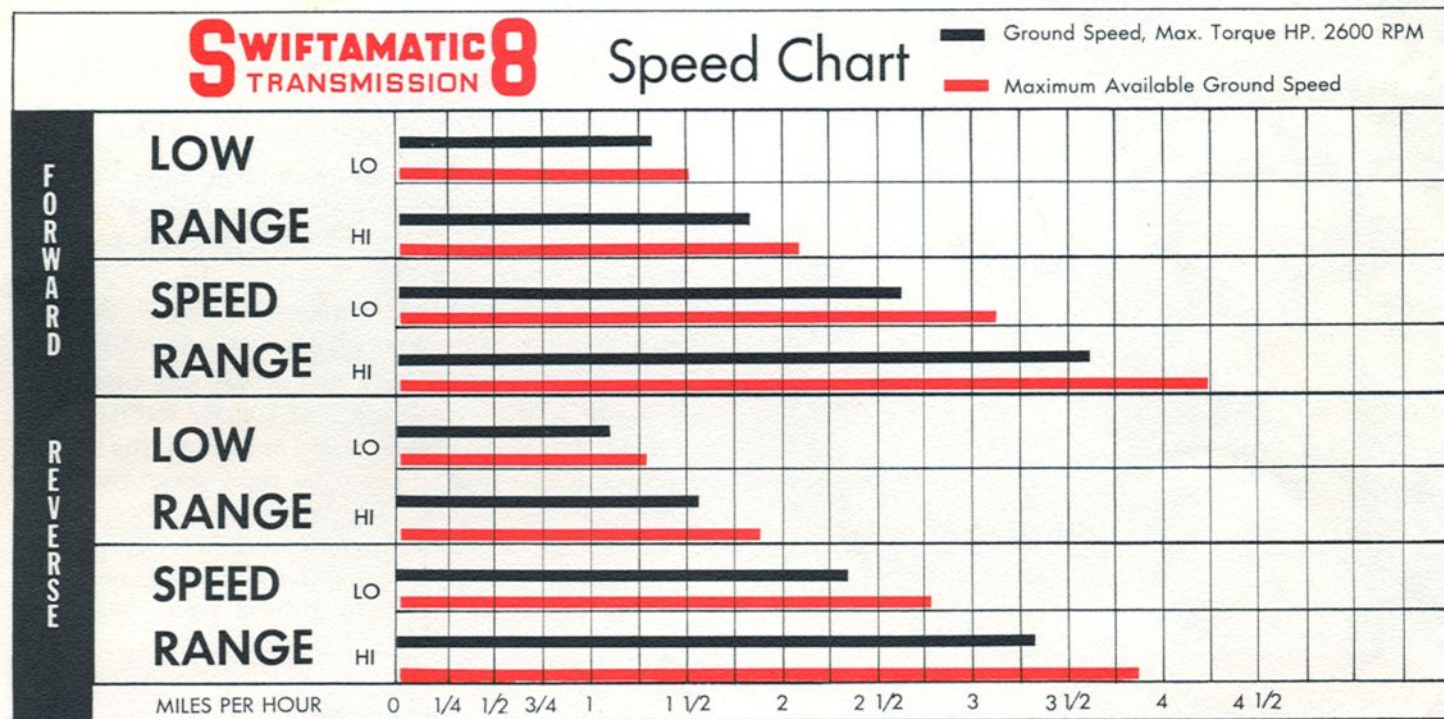

NEW
CONVENIENCE

Now, when your forward speed is too fast for the job . . . gear down to the right speed. The attachment speed stays the same!

Mow your lawn at the top speed . . . ride right on over to the rough mowing. With the mower still at the same efficient speed, flip a lever. Ground travel speed drops to half. Your attachment then gets twice as long to do the job. Plowing in a light soil? Plow fast. Hit a tough spot of hard-packed clay—flip the lever, ground speed drops to a bulldozer crawl but the Rotary Plow is still biting into the soil at its usual speed—getting twice as many bites per foot traveled!

Name the job . . . you select the ground speed that you need. You have *instant* control of exactly the right relationship between ground speed and attachment speed to do the job most efficiently. You get more done, faster, better.

Try for yourself the amazing efficiency of the Gravely Tractor and the *Swiftamatic 8* transmission. An engineering breakthrough that means more speed, more efficiency, more performance for every job!

Only GRAVELY offers 8 GEAR-DRIVEN Ground Speeds—at your Fingertips!

No belts, no chains, no pulleys to change . . . no wheels to change. Just flip the lever, select the right speed.

ALL-GEAR DRIVEN means you get the maximum efficiency from Gravely's high torque, low-speed engine . . . real lugging power that drives the attachment *directly* from the engine through gears and splined steel shafts.

For maximum efficiency with minimum effort—for long dependable service, invest in the best . . . Gravely, with the Swiftamatic 8 Transmission. Four forward speeds, four reverse speeds. For your safety, the reverse speeds are geared lower than forward—another example of Gravely's engineering for your safety and satisfaction!
